

Criteria	8	6	4	2
Format	Application note format followed. Abstract, introduction, procedural and conclusion sections are included and appropriate in length and content.	The proper format was followed but one or more section contains incorrect content or length.	There was an attempt to follow the proper format but more than one section is missing, contains incorrect content, is too short in length or is not computer generated.	The application format was not followed.
Spelling and Grammar	The application note contains no spelling or grammar mistakes	The report contains one or two minor spelling and/or grammar mistakes.	There are multiple grammar and/or spelling mistakes.	There are several spelling and/or grammar mistakes that make the report appear unprofessional.
Writing	The writing is clear, concise and descriptive, easy to understand, professional presentation.	The writing is generally clear and easy to understand with one or two minor exceptions, professional presentation.	The writing is clear in some sections and unclear or lacking necessary detail in others giving the report a mixed feeling.	The writing is unclear and/or disconnected and hard to follow, lacking important details.
Clear	The approach is easy to follow and clearly describes how to determine the impedance diagram from measurements, including the effect of DC coil resistance.	The approach is easy to follow and clearly describes how to determine the impedance diagram from measurements, but does not include the effect of DC coil resistance.	The approach is somewhat unclear and difficult to follow but does generally describe how to determine the impedance diagram from measurements.	The approach taken in the application note is unclear/confusing or does not meet the objective of determining the impedance diagram from measured data.
Complete	Lab data is used as an example and figures, diagrams and tables are included as appropriate and are properly titled and labeled.	Lab data is used as an example and figures, diagrams and tables are included as appropriate but not all properly titled and labeled.	The application note is missing some important information and/or graphics or contains a large volume of extraneous information.	The application note is missing much important information and/or graphics making it difficult to follow.
